## EXPERIENCE

### New York University, New York — *Senior Computer Technician*

April 1996 - October 2016

Automated repetitive tasks with server side scripting / cron jobs. Maintained users database. Ensured business continuity through maintenance of hardware and software. Took ownership of payment processing project during Chip card migrations. Tuned networks for maximum uptime and stability through upgrades of hardware and software.

## PROJECTS

### Latest Headlines React App

This single page app (SPA) grabs the latest 10 headlines from a variety of user selected news sources and presents them in an easily navigable list of cards. This is fully responsive and built with ReactJS, Semantic-UI, the news API, and the Axios API.

Live Version - <https://papanugget.github.io/react-headlines/>

GitHub Repo - <https://github.com/papanugget/react-headlines>

### Technology Firm Site Redesign - *Pulsar Systems*

Completely redesigned the website for IT consultancy firm using modern, responsive principles. Uses Bulma CSS and some jQuery.

Live Version - <http://www.pulsarsystems.com/>

GitHub Repo - <https://github.com/papanugget/pulsar-systems>

## EDUCATION

### Udacity, *Front End Development Nanodegree*

April 2018 - October - 2018

Recipient of a Grow With Google scholarship after a 3 month challenge phase. Was selected out of a pool of 15,000 applicants. Graduated with a month to spare.

## FRONT END SKILLS

HTML5

CSS3

JavaScript (ES5, ES6, ES7)

508 Accessibility

Gulp / Grunt

Test Driven Development -  
Jasmine, Jest

## OTHER

Source Control - Git

Platform Agnostic- Mac,  
Windows, \*nix

SSH

CLI

Adobe CC

## FRAMEWORKS / LIBRARIES

Bootstrap

Semantic-UI

Bulma CSS

ReactJS

jQuery
